THEMATIC PLAN OF CLASSES IN THE DISCIPLINE "INFECTIOUS DISEASES".
VI COURSE. 2023-2024 academic year
Class
number
Topics of practical classes
Duration□ □ (hrs.)
1.1
Epidemiological, pathogenetic and clinical features of intestinal infections.
The place of infectious diseases with fecal-oral mechanism of transmission in the structure of infectious
2
1.2

Written by Infection Thursday, 24 August 2023 02:00 - Last Updated Thursday, 24 August 2023 15:14
Diarrheal syndrome.
Diagnosis and treatment of intestinal infections. Diarrheal syndrome: etiology, pathogenesis, classification
2
1.3
The concept of enterotoxigenic and enteroinvasive diarrhea.
Salmonellosis, foodborne toxic infections caused by opportunistic flora, escherichiosis, cholera, intestina
2
2.4
Intestinal protozoa. Features of the clinic, diagnosis, treatment.
Amoebiasis, clinical course outside of intestinal amoebiasis. Features of laboratory diagnosis of amebia
2

Written by Infection Thursday, 24 August 2023 02:00 - Last Updated Thursday, 24 August 2023 15:14
Viral hepatitis with fecal-oral mechanism of infection (HAV, HEV), features of clinical course, laboratory
2
3.8
Acute viral hepatitis with contact and vertical transmission mechanism (B, C, D, mix-hepatitis).
Features of the course of acute forms. Features of the clinical course, assessment of laboratory and ins
2
3.9
Differential diagnosis of acute viral hepatitis. Complications of acute viral hepatitis. Chronic hepatitis.
Differential diagnosis of acute viral hepatitis. Features of the diagnosis of fulminant course of viral hepat
2
4.10

Written by Infection Thursday, 24 August 2023 02:00 - Last Updated Thursday, 24 August 2023 15:14 Features of the clinical course of infectious diseases accompanied by jaundice. Leptospirosis, tropical malaria, sepsis, yersinosis and pseudotuberculosis, infectious mononucleosis, an 2 4.11 Features of the epidemiologic history and diagnosis of infectious diseases accompanied by jaundice. The role of epidemiological history in the clinical diagnosis of this type of infectious diseases. Basic diag 2 4.12 Differential diagnosis of infectious diseases accompanied by jaundice. Clinical features of variodis express ovijta ja diodic the flooriudii feore international production of the control of the con Test tasks 3. Test tasks 4.

Plan of studies with subjects "internal medicine: infectious diseases", 6 course Written by Infection Thursday, 24 August 2023 02:00 - Last Updated Thursday, 24 August 2023 15:14 2 5.13 Infectious diseases with airborne transmission mechanism in the structure of infectious pathology. Diphtheria. Meningococcal infection. Epidemiological, pathogenetic and clinical features of infectious dis 2 5.14 Influenza, parainfluenza, HRSV infection, adenovirus infection, coronavirus infection. Herpesvirus infections. Features of the modern epidemiological and clinical course. Characteristics of th

Differential diagnosis of sylections diseases accompanied by acute respiratory
