

## Plan of studies with subjects "internal medicine: infectious diseases", 6 course

Written by Infection

Saturday, 17 September 2022 02:00 - Last Updated Saturday, 17 September 2022 05:27

---

THE THEMATIC PLAN WILL BE TAKEN FROM THE DISCIPLINE "INFECTIOUS DISEASES". VI C

**Class number**

**Topic of practical classes**

**Duration (hours)**

1.1

Epidemiological, pathogenetic and clinical features of intestinal infections. Place of infectious diseases

2

1.2

Diarrhea syndrome. Diagnosis and treatment of intestinal infections Diarrheal syndrome: etiology, pat

2

## Plan of studies with subjects "internal medicine: infectious diseases", 6 course

Written by Infection

Saturday, 17 September 2022 02:00 - Last Updated Saturday, 17 September 2022 05:27

---

1.3

Concept of enterotoxigenic and enteroinvasive diarrheas. Salmonellosis, food toxic infections caused

2

2.4

Intestinal protozoa. Features of the clinic, diagnostics, treatment. Amoebiasis, clinical course of extrai

2

2.5

Helminth infections: classification, principles of treatment. Nematodes. Cestodosiasis. Trematodoses.

2

2.6

Differential diagnosis of chronic diarrheal syndrome in the clinic of infectious diseases. Differential dia

2

3.7

Acute viral hepatitis with fecal-oral transmission mechanism (A, E). Viral hepatitis with a fecal-oral infection.

2

3.8

Acute viral hepatitis with a contact and vertical mechanism of transmission (B, C, D, mixed hepatitis).

2

3.9

Differential diagnosis of acute viral hepatitis. Complications of acute viral hepatitis. Chronic hepatitis.

2

4.10

Features of the clinical course of infectious diseases accompanied by jaundice. Leptospirosis, tropical

2

4.11

Peculiarities of the epidemiological history and diagnosis of infectious diseases accompanied by jaundice

2

4.12

Differential diagnosis of infectious diseases accompanied by jaundice. Clinical features of various types

2

5.13

Infectious diseases with an airborne mechanism of transmission in the structure of infectious pathology

2

5.14

Influenza, parainfluenza, MS infection, adenovirus infection, coronavirus infection. Herpesvirus infecti

2

5.15

Differential diagnosis of infectious diseases accompanied by acute respiratory syndrome. Respiratory

2

6.16

The main features of diagnosis, treatment and prevention of infections with a transmissible transmissi

2

6.17

## Plan of studies with subjects "internal medicine: infectious diseases", 6 course

Written by Infection

Saturday, 17 September 2022 02:00 - Last Updated Saturday, 17 September 2022 05:27

---

Malaria: modern features of the epidemic process and clinical course. Leishmaniasis. The problem of

2

6.18

Arbovirus infections and their role in clinical pathology. Tick-borne encephalitis. Ixodic tick-borne borre

2

7.19

Etiology, epidemiology and pathogenesis of HIV infection, classification of disease stages. Prevalence

2

7.20

AIDS. Basic clinical criteria. General characteristics of opportunistic infections. Criteria for establishing
